

Advanced Hydronics

One of the NORA Gold Certification modules

This six hour session session is based on the NORA publication “Advanced Hydronics” written by Dave Holdorf.

Topics include:

- **Hydronic system components**
- **System piping**
- **Heat loss calculations**
- **Equipment sizing**
- **Best piping practices**
- **Domestic hot water**

Technicians who successfully complete the program earn 6 NORA CEU’s.

To achieve Gold status, technicians are required to have a NORA Silver certification, five years of experience working on Oilheat systems and must successfully complete four of the eight gold module classes.
